

Dnyaneshwar Vasant Patil

Software Engineer — AI & Data Science
B.Tech in Artificial Intelligence and Data Science

dnyaneshwarvasantpatil296@gmail.com — +91-7972650026 — [LinkedIn](#) — [GitHub](#) — [LeetCode](#)

Education

B.Tech in Artificial Intelligence and Data Science CGPA: 8.79	Currently Pursuing
---	--------------------

HSC (12th) — Ladkubai Vidya Mandir Percentage: 84.5%	2024
--	------

SSC (10th) — Navjeevan Day School Percentage: 88.60%	2022
--	------

Technical Skills

Programming: C++, Python, JavaScript
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Web & Backend: React.js, Node.js, Express.js, REST APIs, HTML, CSS
Databases: SQL, PostgreSQL, MongoDB
Networking: TCP/IP, UDP, HTTP/HTTPS, DNS, Socket Programming
AI/ML: Machine Learning, Scikit-learn, XGBoost, Computer Vision, Pandas, NumPy
Developer Tools: Git, GitHub, VS Code, Nmap

Internship Experience

Software Development Engineer Intern — Bluestock Fintech • Developed and optimized production-level web features and integrated REST APIs for fintech applications in a collaborative Agile environment. • Debugged critical application issues and contributed to deployment workflows and performance optimization for reliable software delivery.	Sep 2025 – Nov 2025
---	---------------------

Projects

CodeMentorAI — AI Coding Learning Platform
React.js — Node.js — Express.js — MongoDB — REST APIs — [GitHub](#)
• Developed a full-stack AI coding platform providing error-focused feedback instead of complete solutions.
• Built REST API-driven performance analytics and Normal/Restrict modes with controls for copy-paste, undo, and tab switching.

Real-Time Network Traffic Monitoring & Anomaly Detection
Python — Scapy — Flask — TCP/IP — UDP — Nmap
• Built a real-time packet monitoring system using Scapy and raw socket interfaces to capture and parse TCP/UDP traffic, IP headers, ports, and TCP flags.
• Developed sliding-window detection for SYN floods, port scans, and high packet rates with severity-based alerts and a Flask REST dashboard refreshing every 2 seconds.

AgriSense AI — Intelligent Farming Assistant
Python — Scikit-learn — Machine Learning — Computer Vision
• Developed and evaluated machine learning models for crop recommendation and fertilizer prediction using soil and environmental data.
• Built data-driven modules for crop disease detection and market price prediction to support agricultural decision-making.

Research

Published Research Paper — ICRATM-2026 • Published and presented “ Leveraging Seaborn and XGBoost for Customer Analysis and Early Dissatisfaction Detection ” at the 2nd International Conference on Recent Advances in Technology & Management.	Apr 2026
---	----------

Leadership & Self-Learning

Technical Head — Entrepreneurship Development Cell (EDC)
• Led technical coordination for innovation workshops and startup events.
• Solved **270+ Data Structures and Algorithms problems** on LeetCode.

Certifications

• Python for Data Science, AI & Development — IBM, Coursera	Aug 2026
• Getting Started with Git and GitHub — IBM, Coursera	Aug 2026
• Data Analysis Using Excel	Jan 2025
